Subject: Resolution ratifying the County Mayor's action executing acceptance of a Sovereignty Submerged Lands Easement from the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida to Miami-Dade County for the installation of a 60-inch sewer main from Miami Beach to Fisher Island

Recommendation

It is recommended that the Board of County Commissioners (Board) approve the attached resolution ratifying the County Mayor's action executing acceptance of a Sovereignty Submerged Lands Easement from the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida to Miami-Dade County to install a 60-inch sewer main from Miami Beach to Fisher Island.

Scope

The Miami-Dade Water and Sewer Department (WASD) project is located in Commission District 5, Bruno A. Barreiro. The impact is county-wide as the 60-inch sewer force main installed is of county-wide significance.

Fiscal Impact/Funding Source

There is no fiscal impact to the County as there is no charge from the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida for the Sovereignty Submerged Lands Easement.

Track Record/Monitor

WASD's Assistant Director of Legislative and Municipal Affairs, Zaba S. Castro, Esq., will oversee the recording of this easement in the public records of Miami-Dade County.

Background

There is an ongoing time sensitive project to dredge the Port of Miami in order to accommodate the passage of larger vessels originating from the Panama Canal to the Port of Miami. This dredging project entails deepening and widening the Government Cut Channel from Miami Beach to Fisher Island. The dredging project is scheduled to be completed in August 2015. Prior to the dredging project taking place, WASD installed a 60-inch sewer force main along the same route of the dredging project, from Miami Beach to Fisher Island in the Government Cut Channel. The installation of the 60-inch sewer force main served to replace an aging and corroded pre-stressed concrete cylinder 54-inch sewer force main that was at high risk for failure. The sewer force main replacement project was completed by WASD on September 30, 2013, and the way has been paved for the dredging project to be completed timely.

The Sovereignty Submerged Lands Easement before the Board for ratification is for a portion of the 60-inch sewer main force main that was installed by WASD in Government Cut. The total length of the sewer main between Miami Beach to Fisher Island is approximately 1,700 feet in length. Existing easements on Fisher Island and easements from Miami Beach property owners as well as submerged land easements owned by the State of Florida are being acquired for

Honorable Chairwoman Rebeca Sosa
and Members, Board of County Commissioners
Page 2

1,230 feet of the 1,700 feet in length to perform the necessary installation work of the 60-inch sewer force main. The remaining balance of 470 feet in length and 40 feet in width of submerged easement is for that portion of submerged land where the 60-inch subaqueous sewer force main was installed between Miami Beach and Fisher Island that belongs to the State of Florida. That submerged portion of land easement requires a permit from the Florida Department of Environmental Protection which contains a condition that Miami-Dade County obtain a *Sovereignty Submerged Lands Easement* from the Board of Trustees of the Internal Improvement Trust Fund of the State of Florida.

WASD received the *Sovereignty Submerged Lands Easement* (as attached) on March 18, 2014. The Florida Department of Environmental Protection requested that the *Sovereignty Submerged Lands Easement* be executed and returned to them within thirty (30) days; it carries a term of fifty (50) years and was signed by the County and returned to Florida Department of Environmental Protection on April 16, 2014.
